Hi Brian –

Is there a map to accompany this?

As far as a time for a call, I suggest you set up a doodle poll. Like anyone else, I am more motivated to look at this if I have a target date for discussion. I am generally available except for appointments here and there.

I look forward to working with you on this site.

Subject: Falcon RI/FS Sampling Plan

Good afternoon

I am working on scheduling the sampling to complete the RI/FS for the Falcon Refinery Superfund Site and would like your input. Due to the amount of available funds to complete the RI/FS, I am reviewing the data provided by the PRP and the proposed sampling to determine the priority and necessity of additional sampling. I would like to set up a conference call in the next two weeks to go over the sampling and EPA's recommendations based on reviewing the data. Attached are spreadsheets containing all of the data collected by the PRP and the data (subject to revision) that exceeded a risk based number by AOC/media and media for all the data. I am in the process of confirming that the correct screening values were used.

Thanks
